Yehonatan Simian

Software Engineer | C++ Enthusiast

Haifa, Israel yonisimian@gmail.com yonisimian.com yonisimian

Summary

I'm an autodidact who spends my free time on programming and music. More in my portfolio.

Experience

Intel, R&D Software Developer — 2022 – present

- Develop an LLVM-based C++ compiler for chip validation, used by hundreds of engineers.
- Independently initiated projects, such as:
  - Redesigned core algorithms, cutting a user's compile time from 2+ hours to 1 minute.
  - Built a profiling and benchmarking framework, wired into CI/CD and Kibana.
  - Host weekly modern C++ talks and riddles for the team.

HOT mobile / HOT net, Network Controller, NOC — 2019 – 2021

- Monitored wired and cellular networks; drove knowledge sharing at the operations center.

IDF, Signal Corps, Operations Sergeant — 2017 – 2019

- Built a data management program in Java for military use.

Publications

P3817: Structured Binding Assignments — Oct 2026
Yehonatan Simian, Ran Regev
wg21.link/p3817 (ISO C++ Committee (WG21), with a Clang implementation)

Education

The Open University of Israel, B.Sc. in Computer Science, GPA 90 — 2018 – 2024

Skills

Languages: C++, Python, TypeScript

Web: Vue, Firebase

Tools: Git/GitHub, Jenkins, Kibana, LaTeX, Desmos

Music: MuseScore, Cubase, Guitar Pro

Spoken: Hebrew (native), English (fluent)
